

As a citizen and RF engineer I want to clearly state that I expect the FCC to take action against Sinclair for misuse of public airwaves. You gave their stations bandwidth, for free, on the condition that they serve the public interest. Your charter does not say serve the Republican interest, or any other political faction for that matter. "equal time" are the words in your charter. Where are the pre-election anti-Bush documentaries? The FCC must act now to set a precedent that public airwaves WILL NOT be operated for partisan pursues, in this or any other election.
